- Developed PHP APIs for the Sparks Usermodule and tested them on Postman

PROJECTS

PREDICTING MOVIE SUCCESS
Python, Pandas, Matplotlib, Data Science, BeautifulSoup
Apr 2019 – Present
Analysing different attributes on which a movie's rating depends and building a model to predict movie ratings. Dataset was extracted from various sources using BeautifulSoup

ROOM BOOKING SYSTEM
Java, MySQL | Github Link
Nov 2018 – Dec 2018
An application designed to manage and book various rooms at college for organizing events. Contains three different level of users

WAIT OR WATCH – TV SERIES REMINDER
Python, BeautifulSoup | Github Link
Oct 2018
A CLI script which reminds users the release date of the next episode of your favorite TV Series. I used the BeatifulSoup library in python to scrap information from IMDb and send it through email.

LIBROMATE – A BOOK SHARING APP
PHP, MySQL, HTML, CSS, JS | Github Link
Jan 2018 – Apr 2018
A Web Portal where readers can borrow, lend and share books with ease. Was appreciated a lot by the faculties and peers
